Green Mine, India

ALL PRODUCTS IN OUR RANGE HAVE BEEN THROUGH AN IMPORTANT RESEARCH PROCESS AND HAVE ONLY BEEN CHOSEN AS WE BELIEVE THEY ARE THE BEST AVAILABLE.

As part of our green and ethical work practices commitment, we have personally visited the suppliers of our materials in India.

It was a dream come true to see the landscape which produces this colourful stone with our own eyes. We got to see the mines first-hand and were able to meet the workers who hand-chisel every single piece of riven sandstone we use.

Alongside trips to India, we are very fortunate to regularly meet with our suppliers from Italy.

Our latest trip to Northern Italy was to explore the showrooms of our current suppliers and make sure we have the best selection of paving available for our customers.

In addition to visiting the showrooms, our favourite part of the trip is the tours of the production line.

Here we get to see how the porcelain is made. From the huge silo's that store the clay and aggregates to the tiles being printed to the enormous kilns which cure the slabs. Witnessing the whole process, with the factory owners explaining each step, really helps us to be able to give our customers first class customer service and information regarding our products.

At Sandstone Supplies UK you can rest assured that you are buying a high quality, ethically sourced product.

Please bear in mind when choosing a sandstone product, that this is a natural product. Tones, shades and veining will vary from pack to pack due to the natural nature of the stone, and this is one of the many reasons that make it so popular. Please use the images in this brochure as a guide when choosing any sandstone products.

Raj Green – See P38-39

Indian sandstone has always been one of the UK's most popular paving products. With its natural veining and patterns, durability and vibrant colours, sandstone paving is perfect in any surrounding.

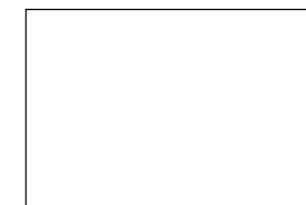

WE SUPPLY TWO FINISHES OF SANDSTONE:

RIVEN is as the stone is mined – natural hand split. With natural surface and edges it gives the paving a rustic look.

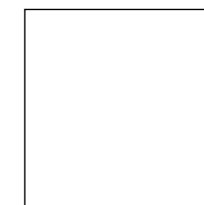

SMOOTH SANDSTONE is also sometimes referred to as 'Sawn and Honed' sandstone. This stone goes through several processes before leaving India. The stone is cut to millimetre precision on 6 sides – Sawn, then Honed-semi polished to create a modern contemporary look.

Thank you to our trusted Landscapers

WHERE POSSIBLE WE HAVE
TRIED TO USE REAL IMAGES
OF REAL GARDENS CREATED
USING OUR PRODUCTS.

None of this would be possible without the
amazing customers and landscapers who have
provided us with images of their brilliant work
and gardens, unfortunately there's too many to
name personally.

Thank you for your continued support from Liz,
Chris and all the team at Sandstone Supplies UK.
